

Waterford Congregational Church

Year-End report 2022

Trustees

The first few months of 2022 the church was closed due to the pandemic. During these two months the trustees continued to monitor both buildings and make sure all preventative maintenance was performed. The following are the major projects that have been worked on during 2022.

Wilkins House:

- There were no major projects performed this past year. It was nice to see the building being used again, and having the summer breakfast events start up again.

Church:

- Repairs to the rear of the church due to the storm in December of 2019 have not been completed. The largest issue was the repair of the chimney and that was completed this past spring. We also had the mason do some repair work on the chimney while we had them on site. The repairs to the roof and trim work have not been completed. This work was started in November but bad weather has forced this work to be put on hold until the spring.

Respectfully

The Trustees, John Wait, Kerry Johnson, Larry Griffin
